

Christmas in October

Just when I didn't think they would arrive before PhreakNIC, a pair of locks I purchased from Ebay-Austria arrived in the mail. It was three weeks and a nightmare in international wiretransfers later and I'm now the proud owner of an EVVA MCS and KESO 2000 lock cylinder. Not only that, but the seller threw in a GEGE high security cylinder and another well-made padlock for good measure, how can it get much better than that?? Well, some damage on one of the MCS keys actually turns out to be a large help to me, I'll post more info about that later ;). Cylinders: Keys:
